**FREQUENTLY ASKED QUESTIONS ABOUT**
**HPER-P393 AND HPER-P 443 INTERNSHIPS**
**EXERCISE SCIENCE, FITNESS MANAGEMENT & PERSONAL TRAINING AND SPORTS MANAGEMENT**
**Revised 1/02/2014**

**Directions:** Please read all of the information contained in this document before you schedule a meeting with the Director of Internship Programs. Thank you!

<table>
<thead>
<tr>
<th>Questions</th>
<th>Answers</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. When should I start investigating prospective internship sites?</td>
<td>Approximately one year before doing your internship. Students on an Exercise Science or Fitness Management &amp; Personal Training plan of study must complete P443 prior to the P393 internship. Review prerequisites under FAQ #3. P393 important dates at the end of document.</td>
</tr>
</tbody>
</table>
| 2. What steps do I follow in finding an internship that’s “right” for me? | **First**, meet with your academic advisor to confirm prerequisite classes.  
**Second**, write down the things **YOU** want to get out of the internship.  
**Third**, attend one of the internship Information meetings held each semester. Meeting dates will be posted on the PE listserv and announced in various HPER courses. Approximate timeline is listed at the end of document.  
**Fourth**, check out/visit potential sites from the Directory of Approved Sites (DAS) (see tips in FAQ’s #4) — and jot down notes as you go. Narrow your list to your top 2 or 3 choices. Talk to other (former) students who have completed internships.  
**Fifth**, semester before your internship or taking P443, submit P443 or P393 Internship Application to the Internship Director. |
| 3. What are the internship prerequisite classes? | Students on an Exercise Science or Fitness Management & Personal Training plan of study must complete P443 prior to the P393 internship. Sports Management students do **not** have to take the P443 class.  
A grade of C or better is required for all prerequisite classes listed below.  
- **For P443:** Exercise Science – BIOL N261, BIOL N217, HPER P373, P374, P403, P409 & P419. P410 may be either a prerequisite or co-requisite. (BIOL K101 & K103 may be substituted for N261 & N217)  
- **For P443:** Fitness Management & Personal Training – (BIOL N261 & BIOL N217); or (BIOL N212, N213, N214 and N215); or (BIOL K101 & K103), P373, P403, P409, & P419. P410 may be either a prerequisite or co-requisite.  
- **For P393:** Exercise Science and Fitness Management & Personal Training – all of the above prerequisites per plan of study for P443 AND P410, P417 and P420.  
- **For P393:** Sports Management – HPER P200 or BUS K201, HPER P402, P411, P415, P418, (M200 or M300 pre-req) P423 (F200 or F300 pre-req), P426 AND 5 of the 7 BUS required classes (either minor or certificate).  
- Internship prerequisite classes for older plans of study are not posted. If on an older plan of study (prior to 2010), then please contact the Internship Director at irbz100@iupui.edu to obtain those prerequisites. |
### 4. How do I investigate potential internship sites?

- Consult with the Director of Internship Programs to help narrow your search field in finding an internship suitable for your long term goals.
- The internship program maintains a “Directory of Approved Sites” (DAS). This DAS consists of organizations that have hosted a Kinesiology intern in the past and/or have expressed an interest in hosting a Kinesiology intern in the future. The DAS also contains information about intern responsibilities, compensation (if any), typical work hours, etc. The DAS can be accessed from the School of PETM’s web page in the Student Portal's kinesiology internship page.
- To log-in to the DAS, use the following log-in password (note that the password is “case sensitive”): HPERP393
- **Note:** Review the tabs at the bottom of the DAS to find internships that are approved for your major.
- If you find a promising site **not** on in the DAS, check out the details, and contact the Director of Internship Programs in Kinesiology to discuss your findings. (However, do **not** assume that you are automatically permitted to do an internship at a site that is not in the DAS.) Additional sites **may** be added to the DAS depending on the location of the potential site and the site’s ability to provide a quality experience for student interns.
- Surf the web – new internships show up regularly.
- Visit sites that appeal to you and look like they will provide the professional development opportunities of interest to you. Indicate that you are in the information gathering stage—you are not applying for an internship at this point.

### 5. Why do sites need to be approved and put in the DAS?

The Dept. of Kinesiology maintains the DAS as a way of making sure that the sites are clear about what we expect of interns and that they can provide adequate supervision for students (e.g., the site supervisor should have a degree in a related area and/or proper certifications as well as be willing to mentor the student intern.)

Students should realize that potential sites out of the Indianapolis area are much less likely to be approved because of limited resources the department has for supervising interns.

### 6. Do I need clearance or permission from the IUPUI HPER P393 Director of Internship Programs before I start investigating/visiting prospective sites?

No, since you are in a “fact finding” or “information gathering” phase regarding your internship. Inform prospective host sites that you will need to be declared eligible and your Internship Application approved by the Internship Director before you will be authorized to accept a position at a potential host site for the internship.

### 7. What information should I look for when investigating potential sites?

You are “shopping” to find a site or sites that suit your needs and interests. The better research you do ahead of time, the more likely you will locate a site that meets your needs and goals.

**Criteria to Consider**

- Does the site match your goals for the internship?
- What is that site’s internship application process (i.e. resume, Interview)?
- What is deadline to apply for the internship (need permission from IUPUI first)?
- When are internship applicants notified regarding being hired?
<table>
<thead>
<tr>
<th>8. Do I need clearance or permission from IUPUI before I accept a position for an internship?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>YES!!!</strong></td>
</tr>
<tr>
<td>Complete and submit an “Internship Application” to the Kinesiology’s Internship Director on or prior to the deadlines listed at the end of this document.</td>
</tr>
</tbody>
</table>

The Internship Director will review your application and check prerequisites:

- have successfully completed the required prerequisite courses (see FAQ #3)
- satisfactory sample of an internship application, cover letter and 1-2 page resume
- signed that you understand the internship expectations

The Director will notify you within 14 business days to advise whether or not you have met eligibility requirements, and what your next steps are in formally applying to a site for an internship.

**INTERNSHIP SITE APPLICATION DEADLINE**

Each internship site has its own set of deadlines and procedures/formats for internships. You will need to determine if any site/s you are interested in has/have deadlines, what those deadlines are, and be responsible for getting your materials in on time. Some sites set deadlines as early as 12 months or more in advance, others will entertain applications very close to the start date, and many sites have deadlines somewhere in between.

</tr>
<tr>
<td>10. Why is there a deadline for submitting an “Internship Application” to the Department of Kinesiology?</td>
</tr>
<tr>
<td>11. What if I miss the deadline for turning in my Internship Application?</td>
</tr>
<tr>
<td>Do I have to wait another semester?</td>
</tr>
<tr>
<td>12. May I take classes while I’m doing my internship?</td>
</tr>
<tr>
<td>13. May I work a part-time job while I’m doing my internship?</td>
</tr>
<tr>
<td>---</td>
</tr>
</tbody>
</table>
| 14. What steps will I follow to apply for an internship? | The steps below outline what you need to do to complete the Internship Application for the Dept. of Kinesiology. It is assumed that you are simultaneously completing the procedures that are outlined by the various sites for their internship program.  
   
1. Complete the Internship Application form then submit it to the Director of Internship Programs.  
2. The Director of Internship Programs will notify you within 14 days whether or not you have met internship eligibility prerequisites. If “yes”, the Director will approve you to proceed with accepting a position at your #1 preferred potential host site. If “no”, the Director will advise you what steps to take to earn eligibility.  
3. Once the Director notifies you of your internship eligibility, contact your top internship site about accepting a position. Also go on-line (OneStart) and register for the course (HPER P393).  
4. If the site requires an interview and you have not yet done this, prepare a list of questions you want to ask on an interview—you are interviewing the site as well as the site rep interviewing you.  
5. Let the Director know the results of your application—when you have been offered and have accepted an internship, or when you did not receive an offer and need to initiate contact at a second potential site.  
6. Attend the Final Instructions/Send Off meeting for interns—held 2-3 weeks prior to the start of the upcoming semester. Failure to attend this meeting may jeopardize your internship eligibility! |
| 15. Duration of internships? | 480 clock hours are required for those taking the P393 for 10 credit hours (Sports Management students); and 350 clock hours for those taking the P393 for 7 credit hours (Exercise Science and Fitness Management & Personal Training). Some host sites may have internships that last longer—you will need to decide if you are willing to accept an internship that is longer than required by your plan of study.  
There are lots of ways to configure those hours—depends on what the host sites needs/expect and what you and the site supervisor negotiate at the onset. Some sites have very fixed/set daily and weekly schedules; others will accommodate your schedule to some extent. Discuss/settle upon the options when you interview—BEFORE you accept an internship offer.  
Samples of ways to divide up the 480 hours: 480/12weeks=40 hrs./wk.; 480/15wks = 32hr/wk.; 350/10wks = 35hr/wk.; 350/12wks = 29.16hr/wk.; or 350/15wks = 23.33hr/wk. |

<tr>
<td><strong>16. I want to intern at a site NOT listed on the HPER P393 “approved” list” - the DAS. Do I go ahead and set up my own internship?</strong></td>
<td><strong>1. No, you should not move forward with the internship.</strong> Contact the Department of Kinesiology’s Director of Internship Programs to advise her/him of your interest in a site not currently in the DAS. Gather specific information about the site before you contact the Director – site’s internship contact person, name of organization, address, phone, FAX, website address, email and potential duties as an intern.</td>
</tr>
<tr>
<td></td>
<td><strong>2. The Director is responsible for contacting potential sites, checking to see if that site hosts interns, requesting that the supervisor completes/submits an internship host site application.</strong></td>

<td>--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
</tbody>
</table>
| **17. What start date is recommend for internships? Does my internship need to start the same day as IUPUI's semester or summer session?** | START DATE? Depends on when your placement site needs/expects you to start—and how flexible that site is in accommodating commitments in your schedule.  
Ask about the potential start date when you interview at the site—find out the expected starting and ending dates. As far as the Department of Kinesiology is concerned, you may start as soon as the previous semester or summer session ends. We do not want anything to interfere with your present academic work and responsibility. Any exceptions must be cleared by the Director. |
| **18. How far along in my degree work do I have to be to be eligible for an internship?**                          | You need to have met all prerequisite requirements listed in FAQ #3 for your plan of study.  
Note: Acceptance to the internship is dependent upon students’ performance in the previous semester. For example, if a student is planning to do an internship in the spring semester and fails to meet all prerequisites at the conclusion of the fall semester, the student will NOT be allowed to do the internship. All approvals are “conditional” until the previous semester’s grades are reported and checked. |
| **19. Does IUPUI provide liability insurance for students while they are doing an internship?**                  | **NO!** The University provides liability insurance only for one group – medical students. Some internship host sites provide interns with liability insurance coverage; others do not. Some host sites require that you show proof of liability insurance coverage before you will be allowed to start your internship.  
When you are discussing internship possibilities with prospective sites, ask whether the site requires it and then ask if they provide it or expects you to provide your own coverage.  
If liability insurance is needed, read question FAQ #21.  
Upon graduation and when you are working in the health and wellness industry, it will be important for you to obtain liability insurance coverage—unless your employer provides it for you. |
| **20. What does liability insurance cover?**                                                                       | Varies with the policy. In general it will provide a designated maximum amount of funding to cover legal fees in the event you are involved in a liability lawsuit. If you are found “liable” for an injury or accident to a patron/client under your supervision, the court could require that you pay a certain amount of money in damages. If you do not conduct your activities in a manner that is safe and prudent, in line with current standards for your profession,—that is, you are negligent in some manner and your action results in harm to the person under your care/supervision, you could be found liable and thus responsible for damages. This coverage will typically pay these charges for you if you have the coverage. |
| **21. What are sources for liability insurance?**                                                                    | Check with your insurance agent to see if professional liability coverage may be available as an “add on” to your homeowner’s and/or renter’s insurance.  
Several professional organizations offer liability insurance to members, including student members. We strongly recommend that you join at least one national professional association! Typically the cost for student membership and for liability coverage is much less than is the case for professionals in that field. |
### Sample professional organizations offering liability insurance to student members include AAHPERD, NIRSA, ACSM, and NATA. Membership can run anywhere from $40-$100 a year and the insurance from $50-$150/year for students.

The Director of Internships Programs maintains a list of inexpensive liability insurance options.

#### 22. I want every second of every minute of my internship to be exciting, challenging, stimulating, and directly related to my professional development goals! Is this too idealistic?

No, not really! The goal is for the internship program is to give you “real world”, “hands on” experience in a setting that is closely related to the degree track you are pursuing and to your interests.

We advise internship sites that we expect their programs to engage our students in professionally relevant, mentored experiences for a significant portion of the internship.

However, we also know that in every setting there will be activities that are not directly related to your top interests, and even activities that are necessary to program and facility operation—not exciting, not challenging, mundane, even boring—but must be done. Examples—cleaning, filing, posting data, folding towels, inventorying.

As you consider prospective sites and as you interview, check into the types of activities interns will be assigned, including activities such as cleaning, filing, posting data, folding towels, inventorying. If the proportion of day-to-day operational activities is greater than suits you then (a) find a different internship or (b) if you accept it, embrace it and have a positive attitude about it. Understand the Director of Internships Programs expects some day-to-day operational work to be involved with the internship, if it seems to be the majority of your time, then inform the Director of the situation.

#### 23. Do HPER P393 internship hours have to follow a definite/regular schedule?

The internship must consist of 480 hours for the 10 credit hour internship (Sports Management) and 350 hours for the 7 credit hour internship (Exercise Science and Fitness Management & Personal Training)—whether from a “regular” or “irregular” schedule.

Discuss the schedule expectations when you interview—find out what hours the agency/facility will require—and consider if/how that will work in your life. A site may ask you to work a “split shift”—say Tue-Sat from 5:30 am to 9 am and 4:30 pm to 8 pm. Or 8 am to 3 pm weekdays plus every other Saturday.

If the schedule the agency presents will not fit with your commitments or you would like the site to consider some modifications—speak up and negotiate that before you agree to accept the internship or look for a different internship that better meets your needs.

#### 24. Beyond the time I spend at the internship site, will there be any other assignments to earn HPER P393 credit?

1. Portfolio development – you will work on this, both at your internship site and at home.

2. ONCOURSE – you will need to check P393 OnCourse frequently for emails, announcements, etc. related to your internship.

3. There will be a survey for all interns to complete during the semester/session of the internship.
4. You will participate in a portfolio discussion and exit interview one-hour meeting with the Department of Kinesiology’s Director of Internship Programs at the conclusion of your internship.

25. Is it OK to work extra hours at my internship site to earn money?  
YES. Many sites provide this option. Check on opportunities during your initial interview—or shortly thereafter. Jobs range from covering the front desk to establishing/working with personal training clients to staffing special events. Keep in mind that you need to be rested/sharp/effective during your internship hours—avoid working so many extra (income producing) hours that you compromise your internship performance.

26. How often are interns to “check in” with the Department of Kinesiology’s Director during the internship experience?  
ONCOURSE – check the HPER P393 OnCourse site weekly. We will be posting emails, general announcements, updates, etc. there. 
There are several specific times when you are to “check in” with your Internship Director—end of first week (send goal statements), Director’s visit/s to you on site, internship survey halfway through. 
The Internship Director will be contacting you regularly—by email (ONCOURSE) and/or by phone throughout your internship—to “check in”. 
Feel free to “check in” at any time you have something great to share, a situation to discuss, a question to ask.

27. If our internships aren’t paid, is there a way to spend less time on the internship so we can get another job?  
The internship must consist of 480 hours for the 10 credit hour internship (Sports Management) and 350 hours for the 7 credit hour internship (Exercise Science and Fitness Management & Personal Training). We ask that you devote a majority of your time to the internship—and work only a few additional hours a week. 
We advise students from the day they enter the Kinesiology Department that an internship is required. Students need to plan ahead so that the internship fits into their schedules and financial plan. 
Plan ahead to save up money so that you will have adequate funds available during your internship to be able to devote the majority of your time to the internship.

28. What about the grade for the internship?  
HPER P443 is a graded class (A, B, C – must obtain C or higher to continue with P393). 
HPER P393 - Internship (10/7 credits) is S/F course — you earn either a Satisfactory or a Fail grade. If you pass the course, your GPA is not affected. If you fail the course, your GPA will be negatively affected! 
The Director of Internship Programs awards the grade—NOT the site supervisor. 
The criteria include your performance on the quality of your portfolio, on ratings you receive from your site supervisor on 2 formal evaluations, on how well you follow timelines for submitting various assignments.

29. When it comes to holidays and vacation schedules, whose calendar do I follow— IUPUI’s or my host site?  
IUPUI expects interns to follow the calendar/schedule of your internship host site.
Be sure to talk with the host site internship supervisor during your interview and/or the first week of your internship if you want to discuss options for holidays or days off.

### 30. Can I do my internship where I currently work?

**Probably not.** Check with the Director of Internship Programs about a possible exception. However, you should realize that the point of doing an internship is to learn new things and new ways of doing things. This is more difficult to achieve since you already know their ways and techniques.

### 31. If I have a question about internships that isn’t answered in this FAQ document—where can I get an answer?

Contact the IUPUI Department of Kinesiology’s Director of Internship Programs. Currently, this position is held by Mr. Jay Bradley, 274-0617 or irbq100@iupui.edu.
